Introduction

Frontend Developer with 4 years of experience building scalable, high-performance Angular applications using **JavaScript, RxJS, HTML5, SCSS**, and modern frontend architecture. Skilled in state management **(NgRx)**, reactive programming, component lifecycle optimization, and creating modular, reusable UI libraries. Strong expertise in **REST API integration, responsive UI/UX, WCAG** compliant accessibility, and collaborative agile development. Passionate about performance tuning, clean architecture, and delivering seamless user experiences.Driven by curiosity and continuous improvement, I enjoy contributing to products that solve real user problems and scale gracefully.

Work Experience

Accenture (Sep 2021- Present)

Frontend Developer   *Pune*, India

- *UI Development Experience:* Pioneered a responsive web application for the Credit Suisse Client Portal, guaranteeing consistent brand representation across devices and boosting user engagement scores
- Designed wire-frames and UI mock-ups using Figma and Adobe tools. Interacted directly with clients for requirement gathering and design validation.
- Authored architecture documents, component design specs, and onboarding documentation, improving team productivity and cross-team collaboration.
- Built 30+ UI wire frames with prototypes in both Desktop and Mobile View used by 1000+ internal users. Implemented responsive layouts for seamless mobile and desktop experiences.
- **Relevant Skills - HTML5, CSS3, Javascript, Figma, AdobeXD Wire-framing & Low-Fidelity Design, UI Design, Design Systems & Component Libraries, Responsive Web & Mobile Design, User Flows & Journey Mapping, Typography & Color Theory, Prototyping**

- *Frontend Project Experience:* Developed modular, reusable Angular components using Angular 8–15 for enterprise-grade applications(Insurance and Healthcare Platforms), ensuring scalable architecture and consistent UI patterns.
- Implemented **dynamic routing, lazy loading, and component-driven architecture** to optimize performance and improve app maintainability. Integrated CleverTap to capture and track user events for analytics.
- Integrated RESTful APIs with real-time data updates using RxJS, Observables, BehaviorSubjects, and state-driven UI flows.
- Built responsive layouts using **SCSS, Flex/Grid**, and ensured seamless usability across desktop and mobile devices. Contributed to a custom UI component library, adding reusable widgets and UI patterns used across multiple micro-frontend modules.
- Implemented error handling, logging mechanisms, and worked on compliance requirements for healthcare applications. Collaborated in Agile sprints—handled story grooming, sprint planning, and release cycles using Jira & Confluence.
- **Relevant Skills - Angular 8-15+, HTML, SCSS TypeScript, Postman, JavaScript (ES6), RxJS, Node.js, Async Data Handling, Angular Material, CI/CD Pipelines, Bootstrap, Lazy Loading, OnPush Change Detection, State Management Concepts (NgRx), Interceptors, Chrome DevTools, Prettier, Husky, REST API Integration, GitHub, GitLab, VS Code.**

Certifications

Web Designer(Internship)
Wyreflow Technologies

Java SE8 Programmer
Oracle Certification

Scaled Agile(SPC/SAFe Practioner)
SAFe 6.0 Practitioner

Education

Technocrats Institute of Technology and Science   *2017 - 2021*
Engineer's Degree, Computer Science and Engineering
Bhopal, India

- ○ **Relevant coursework:** Data Structure and Algorithms, Object Oriented Programming, Software Engineering, Operating Systems, Database Management Systems, Computer Networks, System Design, Microprocessors and Microcontrollers, Digital Logic Design, Programming in C/C++/Java, Web Technologies, Computer Graphics, Artificial Intelligence, Machine Learning, Compiler Design, Software Testing

The Woods Heritage School (ISC)   *Intermediate*
Physics, Chemistry, Mathematics (PCM)
Jhansi, India
